

Trader Update

Date: September 23, 2009

Audience: NYSE Amex Options Participants

Subject: Network Connectivity Policy for NYSE Amex Options Trading Floor

Summary:

Effective October, 2008, firms wishing to establish or terminate network connectivity to the NYSE Amex options trading floor are required to utilize the NYSE Technologies SFTI Network. There is no technology support or physical facility to allow firms to directly establish or terminate proprietary network connectivity to the NYSE Amex options trading floor. SFTI access can be established directly via an NYSE Co-location facility, access center or approved extranet.
