Subject: ArcaBook Multicast Update

NYSE Arca made an announcement on July 21st, 2008 that we were increasing the number of ArcaBook ETF Multicast Equities Channels from two (2), to four (4). We had anticipated this change would be implemented sometime during the third week of August. However, our Development Team made some changes to the feed such that larger packets are sent. This change has rendered the additional channels unnecessary at this time. Future circumstance may require us to add more channels. We will notify you well in advance when we do. We have modified our multicast spec to remove the proposed new channels and v2.9 is available online at <http://www.nyxdata.com/nysedata/default.aspx?tabid=710>

We appreciate your efforts and support in making this migration to Multicast such a great success!

If you have any questions or concerns, please feel free to contact us at: connectivity@nyx.com or 888-689-7739 option #1
