

# Global Market Data

## Data from the global leader

NYSE Euronext is the world's most diverse exchange group bringing together six cash equities exchanges in five countries and six derivatives exchanges. Nearly 40% of the world's cash market trading occurs on NYSE Euronext equities exchanges, the most liquidity of any global exchange group. Every millisecond, NYSE Euronext delivers critical data to the world's securities industry, data vendors and individual investors.

NYSE Technologies provides high-performance global trading platforms, through innovative market-leading software, market data and a low-latency secure networked community. Together, our flexible and scalable products and services deliver robust, integrated solutions for all market participants from single traders to exchanges. From a single provider, these can be offered as fully deployed, hosted, managed or on-demand services.

NYSE Technologies' Global Market Data business provides high quality data products to help optimize trading decisions and fuel trade analytics with a broad suite of offerings straight from NYSE Euronext markets. Through the Secure Financial Transaction Infrastructure® (SFTI®), we also provide access to market data from other exchanges and multilateral trading facilities.

Global Market Data helps customers gain insight to all NYSE Euronext cash and derivatives markets. Far more than the traditional data provider, we combine NYSE Euronext market data and third-party data to offer global equities, options, bonds, and futures data products, as well as administration services for usage and billing. With a strong focus on meeting customers' rapidly changing needs, we offer high quality and custom financial data solutions that benefit data vendors, trading firms, asset managers, hedge funds and other market participants.

Global Market Data is available for the following markets: NYSE, NYSE Arca, NYSE Amex, NYSE Liffe US, NYSE Euronext, NYSE Arca Europe and NYSE Liffe Europe. Not all products are available in all markets.

## Direct Feeds

When milliseconds make a difference, NYSE Euronext provides you with a competitive edge with one of the fastest real-time data delivery systems.

- Orders/Depth-of-Book
- Trades
- Quotes
- Imbalances
- Indices

## SuperFeed™

SuperFeed™ is a fully managed ticker plant leveraging our best-of-breed market data technology. For the first time, market participants can now tap into the high performance and expansive market reach of NYSE Technologies' market data software with the economics of a hosted, managed service.

## Historical Data

Historical data is available in a wide variety of formats, dates, granularity, specifications and levels of customization.

- NYSE Trades and Quotes (TAQ)
- Orders/Depth-of-Book
- Short Sales
- Closing Prices

## Reference Data

Reference data includes a rich variety of characteristics per listed and traded security including notices, information, messages, reports and more, enabling you to get a more complete market data picture.

- Corporate Actions
- Security Master Files
- Index Weightings
- Symbols

## Analytical Tools

Analytical Tools provide more granular trading information with minimum latency for the sophisticated trading customers. Our product suite helps customers identify market trends.

- **InfoTools:** ProTrac enables you to identify program trading executions on the NYSE in real-time by monitoring program share volume for each stock as executed. ReTrac enables you to identify retail trading behaviors in real-time by monitoring retail share volume as executed. [nyxdata.com/infotools](https://nyxdata.com/infotools)
- **TradeCheck:** Compare the actual price of an executed trade on any European market or MTF with prices available on other trading venues, or with several benchmarks. [tradecheck.com](https://tradecheck.com)
- **BrokerVolume:** Trading firms ranked by volume transacted across NYSE Euronext markets. [nyxdata.com/brokervolume](https://nyxdata.com/brokervolume)

## Data Administration and Reporting Technologies (DART)

NYSE Technologies' leading, vendor-neutral Data Administration and Reporting Technologies (DART) help market participants control and reduce the costs of market data and administrative operations often associated with market data management and compliance.

Customers can:

- Control and monitor access to exchange fee-liable market data.
- Reduce costs by easily identifying unused or underused market data services
- Ensure user compliance with both vendor and exchange data contracts.
- Verify that end-users only access data to which they are entitled.
- Utilize an extensive choice of reporting and audit facilities.

Products include:

- DART Management
  - DART Usage Analysis for Bloomberg terminals
  - DART Usage Analysis Suite: Used for Reuters RMDS
  - DART Netting
- DART Provisioning
  - DART Entitlements
- DART Universal Reporting

**Nyxdata.com** is NYSE Euronext's single portal and file transfer infrastructure for ordering and accessing historical and reference data products.

Easy to access, [nyxdata.com](https://nyxdata.com) offers free demos, and has an easy-to-use subscription as well as convenient downloads and online chart facilities.
