

Date: March 23, 2009

Audience: NYSE Arca Equities Traders

Subject: Equities Multicast DR Failover Test

Highlights: DR Failover from New Jersey Data Center to Chicago Data Center

Summary:

On Saturday, April 4, 2009, NYSE Arca will be conducting a DR Failover for the Equities Multicast servers from New Jersey Data Center to the Chicago Data Center. The purpose of the DR Failover is to test the scenario of a minor/catastrophic event were to happen in New Jersey that Chicago Data Center would take over as the primary. The test will include both Uncompressed and Compacted feeds. Below are the Chicago IP's that will be required for the DR Failover.

TCP Source IP Address ("A" Source)	TCP Source IP Address ("B" Source)
63.211.72.60 - New Jersey	63.211.72.188 - New Jersey
63.211.72.64 - New Jersey	63.211.72.192 - New Jersey
8.9.19.60 – Chicago (DR Failover)	8.9.19.188 – Chicago (DR Failover)
8.9.19.63 – Chicago (DR Failover)	8.9.19.191 – Chicago (DR Failover)

Uncompacted / Compacted Feed ArcaBook Retransmission Request IP:	
New Jersey – 63.211.73.14	Chicago – 8.9.32.38 (DR Failover IP)

Summary:

If you would like to participate in the DR Failover test, please email Connectivity at connectivity@nyx.com.
