

# NYSE Arca Tech 100 Index

The NYSE Arca Tech 100 Index is a benchmark used by analysts, asset managers and private investors to gauge the performance of the U.S. equity market's technology-related companies.

Unlike many other technology Indexes whose historic returns date back only a few years, the NYSE Arca Tech 100 Index was introduced in 1982 and has witnessed a variety of market environments. Through all climates, the Index has tracked the rapid growth of technology and its penetration into multiple industries. The NYSE Arca Tech 100 Index is a recognized technology benchmark providing a thorough picture of activity in the fast-paced, multi-industry world of technology.

### Index Characteristics

The NYSE Arca Tech 100 Index is a price-weighted index comprised of common stocks and ADRs of technology-related companies listed on U.S. exchanges. Companies from different industries that produce or deploy innovative technologies to conduct their business are considered for inclusion. Leading companies are selected from several industries, including computer hardware, software, semiconductors, telecommunications, data storage and

processing, electronics, media, aerospace and defense, health care equipment and biotechnology. Modeled as a multi-industry technology index, the objective of the NYSE Arca Tech 100 Index is to provide a benchmark for measuring the performance of technology related companies operating across a broad spectrum of industries.
