

SFTI Connectivity®

The Premier Backbone to Global Securities Markets

NYSE Technologies' Secure Financial Transaction Infrastructure (SFTI) provides a single point of connectivity with lowest-latency access to trade across asset classes and geographies. Beyond highly reliable physical connectivity, SFTI integrates network-based intelligent application services delivered via our industry-leading enterprise connectivity software platform.

Access global execution venues, liquidity pools, market data, clearing applications and other financial industry participants on SFTI. Reduce your time-to-market with significant cost savings.

Connectivity Options

SFTI is available via geographically diverse Access Center locations.

- Provision your own Ethernet services directly into SFTI Access Centers.
- Connect via our managed end-to-end service which incorporates CPE and first mile circuit provisioning along with proactive remote monitoring. Quick access into SFTI at competitive rates.

NYSE Technologies provides high-performance global trading platforms, through innovative market-leading software and a low-latency global secure networked community. Our flexible and scalable products deliver robust and integrated solutions for all market participants, from single traders to exchanges. From a single provider, these can be offered as fully deployed, hosted, managed or on-demand services.

- Most secure and resilient network with ultra low latency.
- Connectivity for NYSE Euronext, other exchanges, market centers, content service providers and market participants.
- Actively expanding into Europe, Latin America, Asia and the Middle East.

Open, neutral and transparent access to global securities markets.
