

CUSTOMER NOTICE

DATE: March 27, 2008

SUBJECT: Wombat Announces Support for ArcaBook Multicast for Equities

Wombat, the newest addition to NYSE Euronext Advanced Trading Solutions, has announced support for ArcaBook Multicast for Equities. Wombat's ArcaBook Multicast feed handler is plug compatible with its existing ArcaBook TCP based feed handler and provides depth of book data for NYSE Arca Listed, OTC and ETF issues.

ArcaBook Multicast is the recommended low latency equities feed from Arca. Wombat offers the full breadth of Arca feed handlers including ArcaBook for Options, ArcaBook for Bonds and ArcaTrade for Bonds.

Also to be released in the near future, pending Securities and Exchange Commission approval, is the new Arca Quote data feed (real-time top of book quotes) and the ArcaTrades data feed (real-time last sale data), both of which are designed for customers requiring Level1 pricing data.

For more details on NYSE Arca Data Products, including ArcaBook Multicast, visit: www.nyxdata.com/arca

The Wombat NYSE ArcaBook Multicast feed handler, which is compatible with all market platforms supported by Wombat, joins the wider NYSE suite of feed handlers including LRP, Best Quotes, Protrac and ReTrac, OpenBook and Alerts.

A complete list of Wombat feed handlers is available on the web at: www.wombatfs.com/products/feedhandler.htm
