

# Matchpoint Connectivity

Connecting to  
NYSE MatchPoint is  
Fast and Easy

## Portfolio Based Point-in-Time Matching Facility

NYSE MatchPoint is a portfolio-based, point-in-time electronic exchange facility that matches aggregated orders at predetermined times with no market impact. NYSE MatchPoint has been designed to provide the optimal solution for liquidity discovery by creating a centralized exchange-neutral matching environment. The matching facility is based on a sophisticated algorithmic model that will maximize the NYSE Euronext global infrastructure and liquidity relationships.

Accessing NYSE MatchPoint is fast and easy. Users can submit single orders or upload multiple baskets of orders through FIX or the NYSE MatchPoint web-based front end. Orders may be transmitted from member firm desks, member firm Direct Market Access (DMA) and Execution Management System (EMS) platforms, member firm algorithm services or member firm sponsored linkages. Sponsored Participants of NYSE MatchPoint that have direct access may connect through the same linkages.

## NYSE MatchPoint FIX Access

NYSE MatchPoint is accessible over the same standard FIX gateways that are used for access to our equities markets. You can even use the same FIX sessions you currently have in place at NYSE Arca or NYSE CCG (Common Customer Gateway) if you choose to do so. You can find the MatchPoint FIX specification on our website at: [http://www.nyse.com/pdfs/MatchPoint\\_FIX\\_Specifications.pdf](http://www.nyse.com/pdfs/MatchPoint_FIX_Specifications.pdf)

## NYSE MatchPoint Web-based Front End

The NYSE MatchPoint web-based front end is password protected and uses the HTTPS secured communication protocol. If you are interested in using the web-based front end, please call Client Services at +1 888 679 7739, option 3.

## Support and Testing

Prior to going into production with your MatchPoint application you will be required to certify your application using our automated test tool. NYSE Euronext offers an ad hoc test platform for clients to test their applications before the certification process begins. The FIX Support Group can be reached at +1 888 689 7739 or email [fixx@nyx.com](mailto:fixx@nyx.com) to assist with all testing, certification and production assistance.
