## Press Release

### **FLEXTRADER TO LINK WITH NYSE MATCHPOINT**

*First Broker-Neutral EMS to Provide Client Access  
When Facility Launches on January 22*

**Great Neck, New York, January 8, 2008** -- FlexTrade Systems, Inc., a leader in multi-asset algorithmic execution management systems, today announced that its FlexTRADER EMS will be the first algorithmic trading platform to provide direct access to NYSE MatchPoint, the new, portfolio-based, point in time electronic trading facility of the New York Stock Exchange, which will launch on January 22, 2008.

"With NYSE MatchPoint, our clients will be able to execute portfolio-based and single block trades through a fully viable non-displayed environment that trades all securities listed on the major and regional stock exchanges in the U.S.," said Vijay Kedia, president and CEO of FlexTrade Systems. "And since it is a 'neutral' exchange facility, connectivity to it is an ideal complement to a non-broker EMS such as FlexTRADER."

The first session match will occur after hours on January 22 at 4:45 p.m. Once fully operational, NYSE MatchPoint's crossing engine will match aggregated orders at predetermined sessions throughout regular hours and after hours of the Exchange. The intraday matching sessions will occur during regular hours at 10 a.m., 11 a.m., noon, 1 p.m., 2 p.m., and 3 p.m.

"FlexTRADER is a vital link to our members and their customers and we're excited to have the system partner with us," said James G. Ross, Vice President, NYSE MatchPoint. "The execution management portfolio capability of FlexTRADER is a great fit with NYSE MatchPoint's trading model."

FlexTRADER is a fully customizable, quantitatively enriched equity trading and execution management system with a global client base, including institutional users on the buy-side and sell-side, hedge funds, and investment managers. It can execute pre-defined trading strategies and tactics for lists as well as single stocks, and offers those engaged in agency trading, index arbitrage and other proprietary and standard strategies the ability to trade large blocks of equities without revealing an order, while minimizing market impact. In addition to NYSE MatchPoint, FlexTRADER connects to BIDS Trading, more than 100 broker dealers, all leading ECNs and primary exchanges.
