

## MIGRATION TO PILLAR PUBLISHERS

### NYSE PROPRIETARY DATA

Proprietary market data will replace the Legacy market data publishers with NYSE Pillar publishers for select market data feeds. This change is specific to the following proprietary market data feeds:

- NYSE Trades ([Specification Document](#))

### NEW REQUEST SERVER SETUP GUIDELINES

The new Pillar Services will handle proprietary market data refresh and retransmission services.

Customers are required to certify new market data sessions in the NYSE Pillar CERT environment prior to production sessions being established.

Customers certified in one Pillar environment are not required to re-certify, but new sessions/IDs must be requested.

Please refer to NYSE Proprietary Data [IP Addresses](#) for details on the new multicast channels.

	NYSE Trades	
	FIRM USES REFRESH/RETRANS SERVICE	FIRM DOES NOT USE REFRESH/RETRANS SERVICE
<b>CERT/UAT</b>	Configure new Publisher/Refresh/Retrans channels. Pillar Request ID(s) are needed. Complete CERT and Attestation with the new request ID(s). (refer to steps 1, 2, 3 below)	Configure new Publisher Realtime channels.
<b>PRODUCTION</b>	Configure new Publisher/Refresh/Retrans channels. Pillar request ID(s) are needed. NOTE: CERT Attestation has to be completed prior to this. (refer to steps 4, 5, 6 below)	Configure new Publisher Realtime channels. (refer to step 4 below)

Please refer to the following steps:

1. Submit Pillar CERT session [request form](#) to [tms@nyse.com](mailto:tms@nyse.com).
2. Perform one-on-one certification testing with a member of the Firm Testing Team (customers certified in one Pillar environment for new market data sessions do not need to re-certify).
3. Submit an attestation upon successful completion of the testing checklist.
4. Verify connectivity to the new production Publisher multicast channels.
5. Submit Pillar Production session [request form](#).
6. Verify connectivity to the new market data sessions (only for customers using refresh/retransmission services).
