

MIGRATION TO PILLAR PUBLISHERS

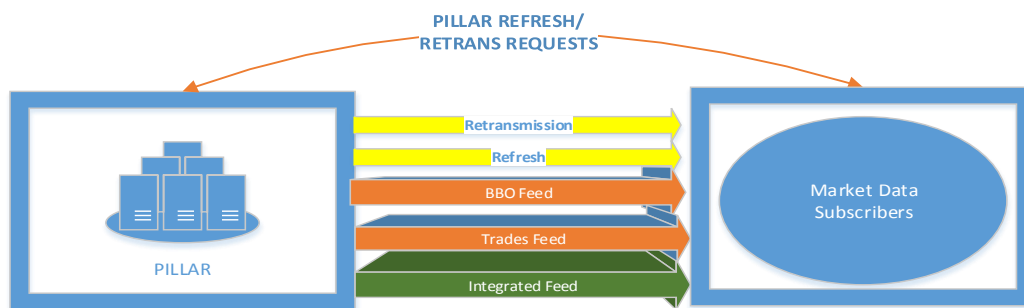

NYSE PROPRIETARY DATA

Proprietary market data will replace the Legacy market data publishers with NYSE Pillar publishers for all market data feeds.

PILLAR REQUEST SERVER - NEW SESSION SETUP GUIDELINES

The new Pillar request server will handle proprietary market data refresh and retransmission services. Customers are required to certify new market data sessions in the NYSE Pillar CERT environment prior to production sessions being established.

(For new market data sessions, customers certified in one Pillar environment do not need to re-certify).

Please refer to the following steps:

1. Submit a test session [request form](#) to tms@nyse.com.
2. Perform one-on-one certification testing with a member of the Firm Testing Team (Customers certified in one Pillar environment for new market data sessions do not need to re-certify).
3. Submit an attestation upon successful completion of the testing checklist.
4. Request Pillar Production sessions
https://www.nyse.com/publicdocs/nyse/markets/nyse/NYSE_Pillar_NGW_Session_Request_Form.pdf
5. Verify connectivity to the new production market data sessions.
