## 1. INTRODUCTION

---

This real-time low latency product provides top of book quote, trades, RFQ and imbalance data for all traded series on the respective NYSE Options exchanges. This data is intended for clients who require a direct, unconsolidated feed and timestamps provided directly from the Exchange matching engines.

- **BBO** - This real-time low latency product provides top of book quote data for all traded series on the respective NYSE Options exchanges. This data is intended for clients who require a direct, unconsolidated feed and timestamps provided directly from the Exchange matching engines.
- **TRADES** - This real-time high performance product provides trade data for all traded series on respective NYSE Options market. This trade data is intended for trading applications which require a direct feed with timestamps representing matching engine event times.
  - For each market, bundling policy mirrors publications to the OPRA.
    - For continuous trading at NYSE Options markets, each 2-sided execution even in the same event results in the publication of a separate Trade message. All auction prints are unbundled.
- **RFQs** - This real-time time high performance product provides request for quote data for Outright RFQ
- **IMBALANCES** - This real-time time high performance product provides imbalance data published during opening and reopening auctions of all traded series on the NYSE Group options exchanges. This data is intended for clients who require a direct feed with timestamps provided directly from the Exchange matching engines.

## 4. OUTRIGHT SERIES SUMMARY MESSAGE – MSG TYPE 323

The outright series summary message is sent every 60 seconds, on a separate multicast channel from the main feed.

The message is sent regardless of whether there has been a change to the series in the last 60 seconds or not. If no trades are published for a series during a given day, no outright series Summary message is generated.

Note: only outright series will publish the Outright Series Summary message. Outright Series Summary Message (with the exception of the Opening trade) will not include any cancelled trades and routed trades which were not published.

The Series Summary message will provide the following trade statistics per series: high, low, open, close and total volume

- a) High shall correspond to the highest trade price of the day
- b) Low shall correspond to the lowest trade price of the day
- c) Open shall correspond to the first trade price of the day
- d) Close shall correspond to the last trade price of the day
- e) Total number of contracts traded for the day

If a trade has been corrected, only the corrected value will be taken into account for the Series summary.

The Opening or First trade shall always be considered as the First trade even if it is cancelled later in the session. Furthermore, the Opening trade price published will be used as the First price in the Series summary message.
