 - For NYSE, executions that transactions that involve a single aggressor and more than one sitting order are published as a single Trade message.
 - For Arca, American, and National, each 2-sided execution even in the same event results in the publication of a separate Trade message.

- 1) Due to its low data rate, the Trades feed does not make use of Source Time Reference messages. All message timestamps consist of a SourceTime field in seconds and a SourceTimeNS field in nanoseconds.
- 2) Due to the stateless nature of trades, the Trades feed does not use the Refresh Request message and the Refresh Header. The Refresh Service only responds to Symbol Index Mapping Request messages.
- 3) The trading Session Change message (type 33) is deprecated. It will be removed from Arca as Pillar is rolled out fully.
