10 Years of  
Excellence

# Key 2022 Survey Results

- Total indexes globally increased 4.43%
- ESG Index growth continues setting records
- Fixed Income ESG outpaces Equity ESG indexes
- Overall stable growth globally
- Benchmarking remains primary use case of indexes

# ESG Index Growth Continues Setting Records

Number of ESG indexes grew 55% and surpassed 50,000 worldwide across asset classes for the first time

# Fixed Income ESG Outpaces Equity ESG Indexes

- Fixed Income ESG indexes increased at a record 95.8% pace, up from 61.09% in 2021
- For the first time, fixed income ESG indexes outnumbered equity ESG indexes which grew at a slower, but extremely rapid rate of 24.15%
- Global fixed income ESG growth was the fastest at 122.5% with EMEA following at 92.5% growth

# Overall Stable Growth Globally

- Fixed income indexes outpaced equity indexes for the third straight year, increasing by 4.52% compared with 4.29%
- Muni indexes enjoyed the strongest year for non-ESG fixed income, growing 10.86% while the distribution across other categories remained stable led by Sovereign, Composite and Corporate Bond Indexes
- Americas leading the way in fixed income with more securitized benchmarks and high-yield and municipal bond indexes than EMEA and APAC

## Global Fixed Income & Equity Index Growth

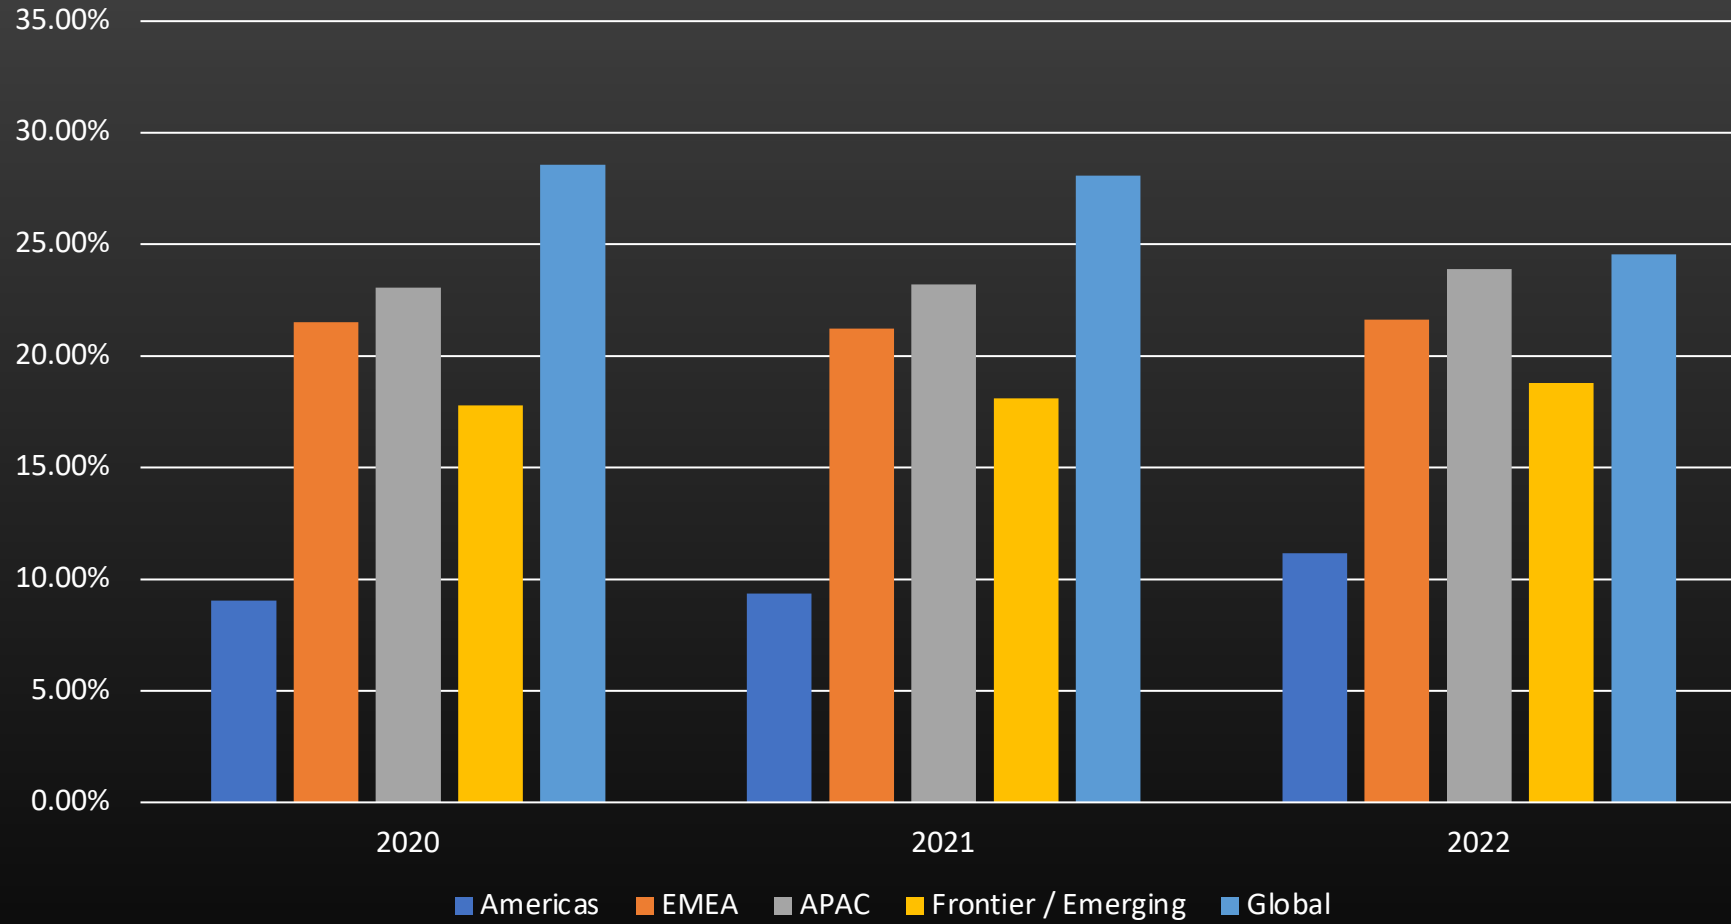

# Benchmarking Remains Primary Use Case

- IIA members administer over three million indexes, with equity indexes comprising 76% of the global total
- With only roughly 11,000 global ETPs, benchmarking is still the primary use case of indexes today
